### Slip resistance tests results

EN Standard : EN ISO 20345 : 2011

**Requirement SRC (SRA+SRB)**

**SRA** Test ground : ceramic / lubricant : water and detergent

On flat **0,50** (>0,32) – On the heel **0,48** (>0,28)

**SRB** Test ground steel / lubricant : glycerine

On flat **0,35** (>0,18) – On the heel: **0,25** (>0,13)

- The Oxytane comfort layer increases the softness, flexibility and the cushioning capacity thanks to its specific density and high concentration of closed cells which absorb heel shocks and vibrations.
- The NBR outsole (Nitrile Butadiene rubber) keeps from fatigue and improves adherence. The innovative position of the sole pattern follows the foot's natural motion for better grip on any surface, besides preventing dirt and liquid from lying under the soke.
- The NBR protective grid reinforces the entire structure and improves the shoe's durability, contact heat resistant to 300°C.
