

TRIFTANE™ Fighter

JALRAFALE X2 JJ728

S1 P HRO SRC
EN ISO 20345:2011
38 to 47

- **Suede leather upper**
- **TRIFTANE™ Fighter sole**

- High-laced boot in perforated suede leather assuring better stability during walking thanks to the TPU heel reinforcement. Leather 1.9/2.1 mm thick. Grey colour.
- Perforated quarters and top of upper for better foot ventilation.
- Breathable upper lining in 3D mesh, with honeycomb structure for improved all-round ventilation of the foot and fast-drying.
- Vamp lining in non-woven fabric. Resists scuffing and acid perspiration.
- Padded ergonomic collar in compact flexible foam, lined for extra comfort and better ankle and Achilles tendon protection.
- Padded tongue to give better protection to the instep, combined with two side gussets to prevent grit from getting inside the shoe.
- Lace up on five pairs of non-metallic lace-stays. Black and grey laces : 120 cm.
- Tabs at the back for easy pull-on.
- J-Multitech footbed : single-block structure made of soft polyurethane and designed to support the foot movement for maximum comfort and energy absorption, especially in the heel area. Perforated in the front part for improved ventilation.
- **Xetane™** 200 Joule toe-cap, **100% composite** fibre. Non-magnetic, lightweight.
- **FleXtane™** By Jallatte anti-perforation inner sole and insert 100 % composite, yielding and flexible, non-detectable, non-magnetic and 70 % lighter than steel. Directly sewn to the bootstrap for 100% protection of the whole surface of the foot.
- 100% composite materials: lighter than steel, amagnetic, non-conductive of heat and cold.
- **Triftane™ Fighter** sole : innovative multifunctional outsole, made of 3 different parts, with a high slip resistant coefficient :

- The Oxytane comfort layer increases the softness, flexibility and the cushioning capacity thanks to its specific density and high concentration of closed cells which absorb heel shocks and vibrations.
- The NBR outsole (Nitrile Butadiene rubber) keeps from fatigue and improves adherence. The innovative position of the sole pater follows the foot's natural motion for better grip on any surface, besides preventing dirt and liquid from lying under the soke.
- The NBR protective grid reinforces the entire stucture and improves the shoe's durability, contact heat resistant to 300° C.

Slip resistance tests results

EN Standard : EN ISO 20345 : 2011

Requirement SRC (SRA+SRB)

SRA Test ground : ceramic / lubricant : water and detergent

On flat **0,50** (>0,32) – On the heel **0,48** (>0,28)

SRB Test ground steel / lubricant : glycerine

On flat **0,35** (>0,18) – On the heel: **0,25** (>0,13)
